The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1, 4-9, 13 and 17-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Booij.

Booij discloses processes for the depolymerization of waste or scrap polyamides to less than 90% of the initial molecular weight (see Table 1). These processes are taught as carried out in methanol or ethanol as solvent and at temperatures between 180 and 400 C. The resulting depolymerized polyamide is taught as precipitated by rapid cooling or addition of a non-solvent followed by filtration. The separated solvents are reused after purification.

Therefore the reference anticipates the rejected claims.

Applicants have argued in the parent application that the reference uses a catalyst while the instant invention does not. It is not seen how the use of a catalyst is excluded from the instant processes.

Applicants have argued that the degree of conversion to monomers of 11.5 % taught by the reference results in polymers with significantly less than 25% of the initial molecular weight. This allegation needs to be supported by factual data or argument in affidavit form.

Claims 2, 3, 10-12, 14-16 and 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
